Defining the Context

Setting the Goals

WHAT DOES IT MEAN COFACTORY?

Cofactory means the contemporary laboratory. Where the new microcosm of the innovation and creativity will be created through hybrid spaces of meeting, thinking and doing.

The flexible spaces are reflecting a freshly elasticised industries & technologies cultures. Following current world changes of traditional manufactories models defunct, impacting the urban and social fabric in the process.

How the new space should look like?

to become a reference point at national and international level for companies and start-ups in deep-tech field

Defining the Context

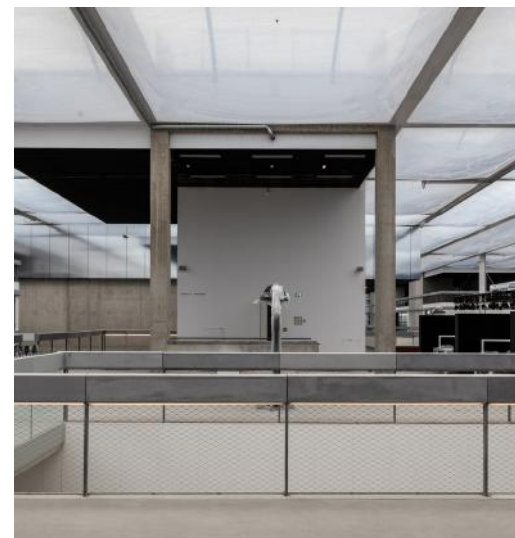

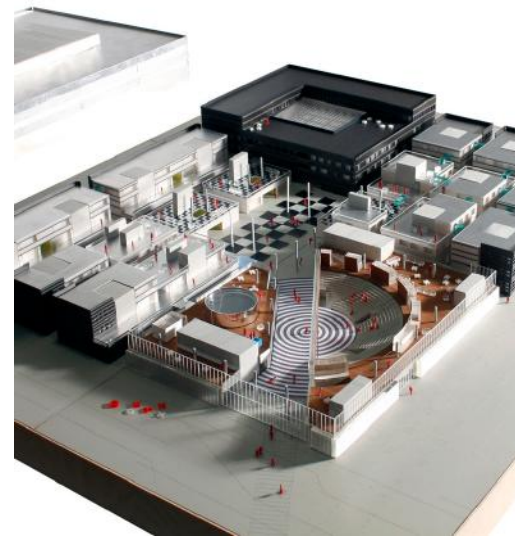

Tendencies Overview

HB Trapper HQ
BIG Architects

HERNING / DENMARK
